Place egg whites in another mixing bowl and beat until stiff. Gently fold the stiff egg whites into flour mixture. Pour into 10 or 12 inch ungreased cake pan. Bake in moderate oven 45 minutes, or until cake separates from the side of the pan. Be careful not to jar cake while baking, as it may become heavy.

When cake is done, invert pan on wire for about 1 hour or until cold. Remove from pan.

When you are buying fresh eggs, alternate between white and brown. Then when placing them into the egg holder of your refrigerator, you will know the ones that are older, and use them first.
